A NOTE FROM TIM

Hello, and congratulations

I've been a DJ for 50 years, and weddings are still my favourite days.

Over those years I've seen how much time stationery takes. Every guest's name, the seating plan, the menus and the signs all need to match.

So I made a collection that does the fiddly parts for you. You type your details once, paste your guest list, and every piece matches.

I'm at every booking myself, and I made this the same way: personally, with care.

Tim

LESS TYPING

Your guest list does the work

Paste your guest list once. The collection fills in the names for you.

One list, many pieces

- A named invitation for every guest or household
- A place card for every guest
- A table plan sorted into tables
- Meal icons on place cards, if you like

Meal choices made simple

Add each guest's meal to the list, for example *Sarah Thompson, Table 3, Fish*. A small meal icon can then appear on their place card, so serving staff know at a glance.

1. Type once

Your names, date and venue go in once and appear on every piece.

2. Paste your list

Copy your guest list from a spreadsheet, notes or WhatsApp and paste it in.

3. Download

Every named card downloads in one PDF, ready to print.

Your list stays private. It is read on your own device and never sent anywhere.

SEND BY PHONE

A digital invitation with RSVP

Your guests tap the link and open an envelope on their phone.

What guests see

- An envelope with a wax seal that opens
- Your invitation in your chosen design
- A map link to the venue
- "Add to calendar" for the date

RSVP straight to you

Guests reply in a tap. The answer comes straight to you by WhatsApp, text or email, so you don't need another app or account.

Send the link by WhatsApp, text, email or social media. It matches your printed stationery.

No app needed. Guests just tap your link. There's nothing for them to download and no account to make.

MAKE IT YOURS

Pets and photos

Your dog can be the ring bearer. Your own photo can go on the front.

Furry Friends design

- Pick your pet from 43 dogs, cats and rabbits
- Pet wording, such as "Our humans are getting married"
- Pet role signs: Ring Bearer, Best Dog and more
- Pet treat labels and a pet care plan card

Your own photo

Add a favourite photo of the two of you, or of your pet, to invitations and save the dates.

Like your guest list, your photo stays on your own device. It is never uploaded.

> **Pet wording:** "Our humans are getting married", "Paws for the date" or "The whole pack is celebrating".

Furry Friends comes with the golden Lhasa Apso pair in every collection. Choosing a different pet, adding photos and changing backgrounds are part of the Complete Collection.
